9D-RG-19254
PATENT

a1
a second portion extending obliquely from said first portion; and
at least one handle extending from said first side of said first portion.

3. (once amended) An oven rack in accordance with Claim 1 wherein said support system comprises a plurality of legs extending from said first portion.

a2
4. (once amended) An oven rack in accordance with Claim 1 wherein said first portion comprises a plurality of first rods and a plurality of second rods, said first rods extending between said first side of said first portion and said second side of said first portion, said second rods attached substantially perpendicularly to said first rods.

9. (once amended) An oven comprising:

a cooking chamber comprising a bottom surface, and at least three sides;

a3
an oven rack configured to rest on said bottom surface of said cooking chamber, said oven rack comprising a first side and a second side; and

a support system attached to said oven rack between said first and second sides, said support system comprising at least a first leg and a second leg rearwardly displaced from said first leg, said first and second legs extending a substantially equal distance from said oven rack.

a4
14. (once amended) An oven in accordance with Claim 9 wherein said support system comprises a plurality of legs extending from said oven rack.

a5
17. (once amended) An oven in accordance with Claim 9 wherein said oven rack support system is further configured to prevent said oven rack from over-extending from said cooking chamber.
